SUMMARY

Product and data analyst with hands-on AI, analytics and cloud experience. Partners with engineering, product and business teams to define requirements and turn SQL, BigQuery, Databricks and Power BI analysis into decisions. Builds end to end, from ML pipelines and forecasts to governance tools for AI agents.

EDUCATION

Carl H. Lindner College of Business, University of Cincinnati **Aug 2025 – Current**

Master of Science, Information Systems | Data Analysis & AI

University of Delhi **Graduated Jul 2023**

Bachelor of Arts | Technology

SKILLS

- **Product & Agile:** PMP® Certified, Jira, Agile Sprint Planning, Backlog Grooming, Scope Definition, SDLC
- **Data & Cloud:** SQL, Python, R, Power BI, BigQuery, Databricks, Microsoft Azure, Google Cloud Platform, Data Modeling, Advanced Excel
- **AI & Machine Learning:** Agentic AI, RAG, LangChain, Vector Databases, scikit-learn, BigQuery ML, MLflow, SHAP, Streamlit
- **Web & DevOps:** TypeScript, React, Azure Functions, GitHub Actions (CI/CD)
- **Enterprise Tools:** Salesforce CRM, ZoomInfo, Bloomberg, Factiva, Capital IQ, Google Workspace

WORK EXPERIENCE

Product Analyst Intern / Consultant – Ascendum Solutions | Cincinnati, Ohio **May 2026 – Present**

- Partner with product managers, engineering teams and executive stakeholders to define feature requirements and roadmap priorities for an enterprise agent-to-agent (A2A) SaaS platform.
- Architect and deploy custom AI agents on **Google Cloud Platform (GCP)** to automate competitive research, technical documentation and root-cause analysis.
- Build **Power BI** dashboards on **SQL and Databricks** to track platform adoption, agent telemetry and KPIs, and turn the findings into executive-ready recommendations on workflow bottlenecks.
- Co-built a consultant management portal (**React, TypeScript, Azure Functions, Azure SQL**) with CI/CD to Azure.
- Built bidirectional field mappings for **170 retail customers** in a bank's lockbox platform migration.

Teaching Assistant – Digital Technology in Business | Cincinnati, Ohio **Aug 2025 – May 2026**

Carl H. Lindner College of Business, University of Cincinnati

- Mentored **100+ undergraduate students** through lab lectures, practical tutorials and digital business assignments.
- Taught hands-on Excel modeling, SQL and Python, applying each tool to real-world business problems.

Cloud Analyst – Google Operations Center | Gurugram, India **Sep 2023 – Apr 2025**

Google Services India Pvt. Ltd.

- Delivered business intelligence and client data to US enterprise sales and business development teams.
- Managed and optimized sales campaigns in Salesforce, monitoring performance metrics and making data adjustments.
- Identified and qualified high-potential accounts using ZoomInfo, Bloomberg, Factiva and Capital IQ.

Marketing Executive – Malvern Panalytical | Gurugram, India **Jun 2023 – Sep 2023**

Spectris

- Developed digital engagement programs and tracked MQL performance in Salesforce, collaborating across global teams.

PROJECTS

- **Cosignal** | *Python* – Built a human-in-the-loop approval and audit layer for AI agents that move money: policy rules route risky payments to a human reviewer, and every action is recorded in an audit trail. Presented at UC's Friday Seminar series.
- **Rehearsal** | *TypeScript, React, Vite* – Built a staging tool that replays past records through current and proposed business rules to show what a change would break before it ships.
- **Hospital Readmission Prediction (MLOps)** | *Python, scikit-learn, MLflow, SHAP, Streamlit* – Built an end-to-end pipeline on 101,766 patient records that compares three models, tracks runs in MLflow and explains predictions with SHAP.
- **Retail Revenue Forecasting** | *BigQuery, SQL, BigQuery ML* – Built a star-schema warehouse over 1M transactions and cut forecast error from 50% to 3.5%, then showed a simple baseline matched it.
- **Pulsetide** | *TypeScript, React, GitHub Actions, Azure* – Built a status page that checks my live demos every 5 minutes and tracks uptime, response times and incidents.

ACCOMPLISHMENTS

● 2nd Place, Nucor Hackathon (SQL analysis and 2026 strategy recommendations) ● Project Management Professional (PMP)®
● Google Data Analyst Certified ● Google Labs Agentic AI Foundations ● Python & R Certificates ● German Language Certificate
